

DIN-SBR ground plate for vibration sensors

This massive steel plate allows you to place your vibration monitor or sensor on the floor instead of mounting it on a wall.

The base plate ensures good contact with the floor and keeps the vibration sensor stable.

DIN-SBR ground plate specifications:

- 150mm diameter
- M6 central thread to mount your sensor / instrument
- 3 supports at 120°
- +- 1,5kg
